FOREWORD

The Research and Studies Directory for Manpower, Personnel and Training lists individuals who perform and/or manage current people-related research and development or studies and analysis for the Department of Defense. It is one of several documents produced at the Defense Technical Information Center (DTIC), San Diego, CA, by the Manpower and Training Research Information System (MATRIS).

DIRECTORY DESCRIPTION

The work unit records included in this Directory are active records from the MATRIS database. Most of the data has been obtained from Research and Technology Work Unit Summaries (DD1498s). If information is out of date in this Directory, it may reflect data that has not been updated on those forms. The Directory is arranged as follows:

1. Each record is categorized as belonging to one of twelve major R&D areas:

- 1.0 Recruitment
- 2.0 Selection/Classification/Assignment
- 3.0 Training/Education
- 4.0 Instructional Technology Development
- 5.0 Personnel Measurement/Evaluation
- 6.0 Personnel Management/Administration
- 7.0 Organizational Development
- 8.0 Manpower Management
- 9.0 Human Performance Measurement
- 10.0 Human Factors Engineering
- 11.0 Human Resource Data
- 12.0 People-Related R&D Management

2. Within these R&D areas, the records are sorted into four categories: Army, Navy, Air Force, and OSD.

3. Within each of these headings, managers and researchers are listed alphabetically. An asterisk following a person's name indicates that this person is the principal researcher. Telephone numbers and organization names for these individuals are included as available.

Titles of each individual's work units are then listed. Each work unit title appears twice: once with the work unit manager and once with the researcher. If the person is responsible for more than one study, titles for each study are printed. Researchers and managers with multiple areas of expertise may appear in more than one section.

4. An Alphabetical Index of names of researchers and managers is included at the back of the Directory for each reference. Following the Alphabetical Index is Appendix A, a list of Military and Civilian Heads of DoD Laboratories, listed by organization, with their respective telephone numbers.

Appendix B lists representatives from The Technical Cooperation Program (TTCP). TTCP is a collaborative group of research managers and policy makers from Australia, Canada, Great Britain, New Zealand, and the United States. The purpose of TTCP is R&D coordination and dissemination. The individuals listed are from the Behavioral Sciences Subgroup (Subgroup U) of TTCP.

We welcome your comments and suggestions for additions or improvements to the Directory. If, for example, your telephone number or organization has changed, please use the Suggestion form (the last page of the Directory) to help us improve the next edition.

MANPOWER AND TRAINING RESEARCH INFORMATION SYSTEM (MATRIS)

MATRIS collects, stores, updates, retrieves, and disseminates information on people-related research which is underway or recently completed by DoD. Research areas include Manpower and Personnel, Training and Education, Simulation and Training Devices, and Human Factors Engineering. The content and criteria for research to be included in MATRIS were established in cooperation with ODD/R&E and OASD/FM&P.

MATRIS includes management information and searching capabilities in areas such as Congressional Category identification, Program Element and Project descriptions, and DoD Budget Category breakdowns. Using a flexible retrieval system, MATRIS provides researchers, managers, and planners with reports on research topics and on R&D management information. These reports can be used to identify related research, to uncover research gaps, and to help provide an overall picture of current Defense people-related R&D and studies.

MATRIS uses a hierarchical vocabulary of research topics and methods, the Human Resources Research Indexing Vocabulary (HRRIV). The twelve major research areas listed above are the major categories of this vocabulary.

MATRIS can search with combinations of approximately 1800 vocabulary terms and can include, delete, or sort on various other data elements to produce many types of reports. These uniquely tailored reports are produced in response to specific user inquiries.

If you would like more information about MATRIS, please contact:

SUGGESTIONS

The MATRIS staff obtains the researcher names, codes, telephone numbers, and organizations listed in this Directory from Research and Technology Work Unit Summaries (DD1498s). We would appreciate knowing about any errors in names, codes, telephone numbers, and/or organizations. If you have suggestions for improving the Directory, we would also like to hear from you. This page of the Directory has been included for your comments.

Please mail your comments and corrections to:
